THE PROBLEM

1. HIGH CHURN RATE: UP TO 60% OF BEGINNERS QUIT THE GYM WITHIN THE FIRST 2 MONTHS DUE TO THE LACK OF A CLEAR ACTION PLAN.

2. HIGH COST OF EXPERTISE: THE HIGH PRICE OF PERSONAL TRAINING (\$15+/HOUR) MAKES EXPERT GUIDANCE INACCESSIBLE FOR 85% OF VISITORS.

3. DELAYED INTERVENTION: MANAGERS ONLY REALIZE A CLIENT HAS "DROPPED OUT" WHEN IT IS ALREADY TOO LATE TO SAVE THEM

OUR SOLUTION WITH GYMINI MODULE

GYMINI MODULE – AN INTELLIGENT MODULE
THAT INTEGRATES DIRECTLY INTO THE
FITNESS CLUB'S MOBILE APP.

DIGITAL ASSISTANT: THE
CLIENT RECEIVES A CLEAR
PLAN: WHAT TO DO, HOW TO
DO IT, AND FOR HOW LONG.

CHURN CONTROL: ANALYZES USER
ACTIVITY AND AUTOMATICALLY
BRINGS PASSIVE CLIENTS BACK TO
TRAINING, INCREASING CLUB
REVENUE

TECHNOLOGY

How it works?

BUILT ON THE MODERN PYTHON PROGRAMMING LANGUAGE AND DATA PROCESSING LIBRARIES FOR INSTANTANEOUS RESPONSE

DATA FLOW ALGORITHM:

1. DATA COLLECTION: AN EXTERNAL BLOCK IN THE APP COLLECTS USER GOALS AND PREFERENCES.
2. GENERATION: YOU WILL RECEIVE A SERVER THAT AUTOMATICALLY CREATES A PERSONALIZED PROGRAM BASED ON SPORTS METHODOLOGY.
3. MONITORING: THE SYSTEM TRACKS GYM ENTRIES VIA TURNSTILE LOGS.
4. ANALYTICS: DATA IS PROCESSED AND DISPLAYED ON THE MANAGER'S SCREEN AS ACTIONABLE FORECASTS.

AI CORE

LOGIC AUTOMATION: DEVELOPED API ENDPOINTS FOR GENERATING PERSONALIZED WORKOUTS AND CHURN PREDICTION.

- DATA-DRIVEN APPROACH: THE SYSTEM PROCESSES REQUESTS IN REAL-TIME, FORMING WORKOUT PLANS BASED ON GOALS (E.G., POSTURE CORRECTION) AND FITNESS LEVELS.
